

Eligible Measures for EnergySmart Rebates

- Rebates are based on national average “deemed” energy savings. **For a limited time only**, measures with a deemed savings of ≥ 1.0 MMBtu receive \$500 (regularly \$250); Measures below ≤ 0.99 MMBtu receive \$200 (regularly \$100).
- Rebates are only available for the measures listed below. **Maximum \$1,000/home.**
- Rebate funds are limited, and are awarded on a first-come, first-served basis.
- Only work by an EnergySmart approved contractor or done by self (DIY) is eligible.
- Rebates cannot exceed the cost of the measure after all other rebates are applied.
- Energy Efficiency measures **MUST** be installed between **May 1st -July 31st 2011 to be eligible for limited-time double rebate values.** Rebate applications must be received no later than August 31, 2011.

\$250 Rebates Now \$500 Rebates! Offer ends July 31st	Minimum Efficiency/Certification Requirements
Attic Insulation	R-38 minimum required in open attic; cathedral ceilings will vary.
Wall Insulation	R-19 minimum, or to fill wall cavity
Crawl Sp/Bsmt or Sub-floor Insulation	<i>R-19 minimum, over unconditioned space only</i>
Perimeter (Foundation) Insulation	R-10 minimum
Duct Insulation	R-8 minimum, over unconditioned space only
Professionally Applied Air Sealing (No DIY)	Air sealing level must be measured by a blower door before and after improvement is made Note: mechanical ventilation is recommended if air sealing reduces air changes per hour to below 0.35
Boiler Replacement	AFUE $\geq 85\%$
Gas Furnace Replacement	AFUE $\geq 90\%$, plus sealed combustion. If home design precludes direct venting, an upgrade to minimum 80% AFUE is eligible.
Furnace/Boiler Tune-Up	
Air or Ground Source Heat Pump	
Pellet Stove	Minimum efficiency 78%, must be properly sized. Only upgrades to a more efficient model are eligible, no new stove installations, unless no home access to natural gas.

More Rebates On The Back!

\$250 Rebates Now \$500 Rebates! Offer ends July 31st	Minimum Efficiency/Certification Requirements
Advanced Combustion/Gasification Wood or Pellet Stoves	Minimum efficiency 75%. Only for upgrades to a more efficient model, no new stove installations, unless home uses electric heat.
High Efficiency Fireplace & Fireplace Inserts	Minimum efficiency 75%. Only retrofits of existing fireplaces are eligible; not newly constructed fireplaces.
Whole House Evaporative Cooler	May not be installed if AC system exists
Energy Star Electric Water Heater	Inc. On-Demand Tankless. Rebate eligible only if replacing an existing electric water heater (not elec replacing gas)
Energy Star Gas Water Heater	Inc. On-Demand Tankless.
Solar Thermal Water Heating	SRCC rated
Solar Thermal Space Heating	SRCC rated
Solar Thermal Re-commissioning	
Windows	Replacements only; not newly created windows. U Value of .35 or less, low e glass.
Storm windows	Meets IECC in combination with the exterior window over which it is installed, for the applicable climate zone.
\$100 Rebates Now \$200 Rebates! Offer ends July 31st	Minimum Efficiency/Certification Requirements
Energy Star Air Conditioner	Requires recycling of existing unit with supporting documentation, where applicable
Energy Star Clothes Washer	
Energy Star Refrigerator	Requires recycling of existing unit with supporting documentation
Energy Star Freezer	Requires recycling of existing unit with supporting documentation
Energy Star Dishwasher	
Solar Light Tube	Maximum one per home rebated
Whole House Fan	Must have controls (thermostat or timer, multi-speed). Fan opening must be properly insulated and sealed in winter.
Air conditioner tune-up	
Professional Duct Repair and Sealing	Not available for Do-It-Yourselfer
